## HIVAIDS IN SOUTH AFRICA - THE FACTS AND THE FICTION

[DOWNLOAD](#)

Health Alert Communications. Paperback. Condition: New. 118 pages. Dimensions: 10.8in. x 8.4in. x 0.5in. Few people realize that the familiar HIVAIDS global statistics are actually estimates. For example, UNAIDS estimated that the Republic of South Africa (RSA) had 140,000 HIVAIDS deaths in 1997. However, after tabulating all deaths for 1997, the Republic of South Africa attributed only 6,635 deaths to HIVAIDS. Such discrepancies are rarely noted. The Republic of South Africa (RSA) stands as the exemplar of these discrepancies. It is reputed to have the world's largest AIDS epidemic with an estimated 5.6 million people living with HIVAIDS (PLWH) in 2008. Such PLWH estimates, as with the estimates of HIVAIDS deaths, are highly questionable. HIVAIDS in South Africa - The Facts and the Fiction clarifies the reasons behind these discrepancies by describing two common misunderstandings of HIV infection that contribute to poor mathematical modeling outcomes. Unfortunately, the health authorities in the Republic of South Africa grant more validity to computer-generated estimates than to their own empirical death counts. HIVAIDS in South Africa - The Facts and the Fiction discusses why these modeled estimates, and the HIV sero-prevalence surveys upon which they are based, are simply implausible. Fully referenced, HIVAIDS in South Africa - The Facts and the Fiction presents and compares raw numerical data on: the tabulated number of HIVAIDS deaths in the RSA; the number of AIDS cases detected by RSA disease surveillance systems; UNAIDSWHO estimates for AIDS deaths in the RSA; and UNAIDSWHO estimates for the number of people living with HIVAIDS in the RSA. The total cumulative numbers of HIVAIDS cases in the United States and the cumulative totals for the continent of Africa are also presented for purposes of comparison, and to place the African and RSA data within appropriate epidemiological context. Overall, these...
