September And February Nutrition Groups Per Cent Underweight of Children with Physical Defects CHAPTER VI GROWTH IN WEIGHT AND HEIGHT First Grade Children SELECTION The total number of entrants to the first grade classes of Public School 64, in September, 1919, were fweighed and the height measured. One hundred and twenty-three of these boys were measured between September 9th and September 24th. Two entered in October and one in November, making 126, from whom the Nutrition Class was selected. Forty boys, ranging from 8 to 20 underweight for height, and with an average per cent underweight of 11.6, were segregated in this class. The early transfer of 2 boys reduced the group to 38. Of the boys weighed after September 18th, ten were found to be more than 8 underweight. By the first of December, four of these had entered the Nutrition Class to replace members who had been transferred to other schools, and in February, 1920, four more entered to replace boys who were not promoted with the group. The other two underweight boys are tabulated with the general group. A Control Group was formed of those nearest the normal standards for height-weight index at their ages. There were found 41 boys who ranged from 4 above to 4 below normal weight for height,...
