Forgotten Books. Paperback. Condition: New. This item is printed on demand. 172 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. Excerpt from The Principles of Logic, for High Schools The author has endeavored, in the following treatise to give a clear, concise, and systematic development of the principles of Logic. Care has been taken to retain the valuable results of the labors of former investigators - results which the world can not afford to lose; yet much will be found that is new, not only in the methods, but also in the matter. The works of the following authors have been examined: Aristotle, Hamilton, Mill, De Morgan, Thompson, Munsel, Whately, Wilson, Tappan, Mahan, Day, McGregor, True, and Coppee. To Hamilton, the author is especially indebted for valuable aid in reference to the following subjects: Classification of Science, General Outline, Concepts, and Modified Logic; and to Mill, for examples illustrating the four experimental methods of investigation. It has been kept steadily in mind that the work is designed for a text-book; and, in accordance with this design, a topical arrangement has been given to the matter, so as to adapt it to the topical method of conducting recitations, which, when followed up by appropriate questions, is, of all methods, the best for the grade of students who will pursue the study of Logic. It will add much to the interest and value of the recitation, to require the student to write out upon the blackboard, the classifications and all other matter whose condensed form renders it practicable. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work.
