

## Excitation of Molecular Vibration by Collision (Classic Reprint)

Filesize: 7.62 MB

### **Reviews**

*Absolutely among the best publication I have got at any time go through. It really is written in straightforward phrases rather than hard to understand. Its been designed in an extremely straightforward way which is just soon after i finished reading this publication through which basically modified me, alter the way i believe.*

## EXCITATION OF MOLECULAR VIBRATION BY COLLISION (CLASSIC REPRINT)

To read **Excitation of Molecular Vibration by Collision (Classic Reprint)** eBook, please click the link under and download the ebook or get access to additional information which might be related to EXCITATION OF MOLECULAR VIBRATION BY COLLISION (CLASSIC REPRINT) book.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Excitation of Molecular Vibration by Collision We have calculated the cross section for excitation of the first vibrational level in the collision of two hydrogen molecules in the ground state. A perturbation scheme must be used because of the many-body problem involved. The cross section is calculated by a partial wave analysis. We consider the collision of two H<sub>2</sub> molecules because the intermolecular potential is reasonably well known for this case. Because of the large masses of the particles, the de Broglie wavelength of the system is much smaller than the range of the intermolecular potential. Consequently many values of the angular momentum must be considered. We find that the major contribution to the total cross section comes from large values of the angular momentum - of the order of 10 to 20 - and that values of angular momentum up to about 80 must be considered. In order to solve the Schrodinger equation for arbitrary values of angular momentum with a Morse potential form for the intermolecular potential, the high speed computer Univac was used. In the energy range of interest, 0.5 to 2 ev, the total cross section is obtained. At energies greater than 5 ev the values for the cross section are larger than the maximum permissible if particle flux is to be conserved, that is, our perturbation scheme breaks down at these high energies. However, the cross section for energies greater than 5 ev is not too significant since electronic transitions, which we have neglected, become appreciable. We find the value of the cross section to be very sensitive to the precise values of the potentials used. This result is to...
