Identification and Characterization of LAB and Probiotic bacteria

By Karna, Bimal / Barraquio, V. L.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | From fermented and probiotic dairy products | Over the last few years, the application of LAB (Lactic acid bacteria) and PB (Probiotic bacteria) as a starter adjunct for developing new fermented and probiotic products is growing faster due to their potential use in human health benefits, pharmaceutical preparations, nutritional improvement of feeds and foods and numerous other uses in dairy industry for future application. Nutritionally modified probiotic products are gaining popularity and continuous support in dairy developed countries and increasing more rapidly than the overall food markets. In this concern, there is an acute need to monitor the survival of LAB and PB for appropriate viable counts. The comprehensive coverage of techniques to identify and characterize LAB and PB for developing new probiotic products, makes this book useful for students, technicians, researchers and manufacturers, working in the field of dairy technology, food technology, environmental microbiology and other related fields. | Format: Paperback | Language/Sprache: english | 104 pp.

Reviews

Without doubt, this is actually the greatest function by any article writer. It is among the most amazing publication i have got read. Its been printed in an exceedingly basic way in fact it is simply after i finished reading through this publication where in fact changed me, change the way i believe.

-- **Arielle Ledner**

It in one of the best book. Better then never, though i am quite late in start reading this one. You wont feel monotony at at any moment of the time (that's what catalogues are for regarding in the event you check with me).
